

Shifting societal views, values, and paradigms to recognize and prioritize the fundamental interconnections between humans and nature that sustain life and well-being	Action 5.5: Co-creating new values and paradigms
Shifting societal views, values, and paradigms to recognize and prioritize the fundamental interconnections between humans and nature that sustain life and well-being	Action 5.4: Facilitating transformative change
Shifting societal views, values, and paradigms to recognize and prioritize the fundamental interconnections between humans and nature that sustain life and well-being	Action 5.3: Changing governance systems
Shifting societal views, values, and paradigms to recognize and prioritize the fundamental interconnections between humans and nature that sustain life and well-being	Action 5.2.: Shifting culture through education and media
Shifting societal views, values, and paradigms to recognize and prioritize the fundamental interconnections between humans and nature that sustain life and well-being	Action 5.1.: Increasing nature's contribution to people
Strategy 4: Transforming governance systems to be inclusive, accountable, and adaptive	
Action 4.4.: Strengthening learning through informed, accountable, and adaptive governance	
Strategy 4: Transforming governance systems to be inclusive, accountable, and adaptive	
Action 4.3.: Securing collaboration and accountability in multistakeholder governance	
Strategy 4: Transforming governance systems to be inclusive, accountable, and adaptive	
Action 4.2.: Engaging diverse actors in inclusive governance	
Strategy 4: Transforming governance systems to be inclusive, accountable, and adaptive	
Action 4.1: Strengthening biodiversity in integrated governance	
Strategy 3: Transforming economic systems for resilience, equity, and justice	
Action 3.4: Adopting new models of production and consumption	
Strategy 3: Transforming economic systems for resilience, equity, and justice	
Action 3.3: Reforming financial systems	
Strategy 3: Transforming economic systems for resilience, equity, and justice	
Action 3.2b: Supporting just transitions. Alternative livelihoods and income sources	
Strategy 3: Transforming economic systems for resilience, equity, and justice	
Action 3.2a: Supporting just transitions. Sustainable consumption and production	
Strategy 3: Transforming economic systems for resilience, equity, and justice	
Action 3.1: Mainstreaming innovation and technology	
Strategy 2: Driving systemic change in the sectors most responsible for biodiversity loss and degradation	
Action 2.4: Supporting civil society and community-led initiatives	
Strategy 2: Driving systemic change in the sectors most responsible for biodiversity loss and degradation	
Action 2.3: Financing for global biodiversity	
Strategy 2: Driving systemic change in the sectors most responsible for biodiversity loss and degradation	
Action 2.2b: Embedding technology in transformative frameworks. Green digitalization	
Strategy 2: Driving systemic change in the sectors most responsible for biodiversity loss and degradation	
Action 2.2a: Embedding technology in transformative frameworks. Circular economy	
Strategy 2: Driving systemic change in the sectors most responsible for biodiversity loss and degradation	
Action 2.1b: Regulating resource extraction. Standards and certification	
Strategy 2: Driving systemic change in the sectors most responsible for biodiversity loss and degradation	
Action 2.1a: Regulating resource extraction. Land, sea, and forest management	
Strategy 1: Conserving and regenerating places of value to nature	
Action 1.5: Advancing integrated conservation and management	
Strategy 1: Conserving and regenerating places of value to nature	
Action 1.4: Shifting from extractive to regenerative management	
Strategy 1: Conserving and regenerating places of value to nature	
Action 1.3b: Basing conservation on diverse values of nature. Management and governance	
Strategy 1: Conserving and regenerating places of value to nature	
Action 1.3a: Basing conservation on diverse values of nature. Protected areas	
Strategy 1: Conserving and regenerating places of value to nature	
Action 1.2: Enhancing rights-based conservation	
Strategy 1: Conserving and regenerating places of value to nature	
Action 1.1: Recognizing and conserving biodiversity
