Subject: Re: IPBES TCA - Global corpus of evidence

Dear friends,

Hope you are doing well.

Just a gentle reminder to please (1) send 20-25 key papers related to your chapter (the DOI is enough) to Rainer (cc), and (2) add your comments for the key words "transformative change" and "nature" [here](#) before tomorrow by October 6th.

Please let me know if you have any questions.

With many thanks.

Dear CLAs and Co-chairs,

Hope you are doing fine.

As we discussed in the SPM meeting here in Norway, we agreed to have a global corpus of evidence related to transformative change and nature based on the peer reviewed literature.

Please, we are asking CLAs of each the Chapter and Co-chairs for two things:

- 1) Provide a list of 20-25 papers you think are relevant for your chapter (e.g. key papers related to visions and transformative change).
- 2) Refine/improve the key words we initially drafted [here](#) on transformative change (first level of search) and nature (second level) to have a list of terms for which we all agree with.

Please upload the PDFs of 1) [here](#), we plan to have ready 1) and 2) before October 6th. The plan is also to have the corpus of evidence and a description of the routine to create this corpus in the Data Management Plan, both before sending the revised SOD (Nov. 24th).

Once we have this corpus of evidence, the TSU will contact CLAs of each Chapter to identify specific terms (third level of search) to extract information and use it for the purposes of each chapter (e.g. features/principles, visions, clusters of theories, obstacles, and doptions).

Addin and Rainer, please add anything you consider necessary in case I am missing something.

With many thanks and best wishes to all.

Sebastian
